

jobber (hurtownik, makler giełdowy)

Though it may seem short for “odd-jobber,” this actually refers to two kinds of workers: one who works occasionally, and a wholesaler.

kaizen (ciągła poprawa, ulepszenie)

The word is derived from Japanese, this is a philosophy of continuous improvement, both industrial and personal.

load (opłata, marża)

This term is used to describe the commission on a mutual fund.

melon (wysoki zysk)

An actual large profit to be shared among several.

near money (quasi-pieniądz)

This term refers to the next best thing to liquid, something that can be liquid quickly (like government bonds).

oligopsony (oligopson)

A market with a limited number of buyers instead of sellers. Model-specific car part manufacturing fits into this category.

perpetual (bezterminowy)

For example, a perpetual bond, one without a fixed maturity date, which means it would never stop accruing value.
